54	In	Garbage & refuse properly disposed; facilities maintained			
55	In	Physical facilities installed, maintained, & clean			
56	In	Adequate ventilation & lighting; designated areas used			

#### **Observed Violations:**

### 22- Proper cold holding temperatures

### Priority

3-501.16(A)(2): Time/Temperature Control for Safety Food, Cold Holding (P)

### **Inspector Comments:**

Two door reach in refrigerator temping between 44-46 degree.

Cold table- patties temped at 43 degrees, inner thermometer reading at 41 degrees. Proper refrigeration temp is around 38 degrees in order to hold the food at 41 or below.

## 30- Pasteurized eggs used where required

### 36- Thermometer provided & accurate

OBSERVATION: (CORRECTED DURING INSPECTION)

#### Core

4-204-112: Temperature Measuring Devices-Functionality (C)

### **Inspector Comments:**

No thermometer in 2 door reach in refrigerator. Thermometer placed in the refrigerator during inspection. Monitor temperatures daily to ensure proper holding temp. Checking the ambient air temperature can alert you to an issue, but also monitor the holding temperature of the food inside the unit.

### 39- Contamination prevented during food preparation, storage & display

#### Core

3-305.11: Food Storage-Preventing Contamination from the Premises (C)

### **Inspector Comments:**

Observed buns on floor. All food should be up off the floor 6 inches. Storage space is limited. Try reorganizing items on shelf or at a minimum a crate can be placed under these boxes in order for them to be lifted up off the floor.

### **General Comments and Notes**

Follow up Required: Yes

Follow up Date (if applicable): 10/27/2019

Marale.

Recieved by:

Inspector Name: Amy Jamison
